

# Lunar Tectonics

Co-Leads: Amanda Nahm (Amanda.Nahm@dlr.de), Catherine Johnson (cljcathy@gmail.com)

## Introduction

### Tectonic structures

- Description of recent data sets
- Graben
  - Morphology + types
  - What's new
- Wrinkle ridges
  - Morphology
  - What's new
- Lobate scarps
  - Morphology
  - What's new

### Timing of tectonic structure formation

### Lunar seismicity

- Relationship to tectonic structures
- Activity predictions/assessment
- What's new

### Conclusions, synthesis, outstanding questions

- Implications for global/regional evolution models
