**Key:** “A” - Significant in *all* models including Final Model; “B” - Significant only in reduced Block Model; “N” - Never Significant; “---” - Not included in given model specification.

*Note:* The first two models are Ordered Logistic Regressions. The final three models are Logistic Regressions and represent “initiation” models, meaning only respondents who were not in the outcome at Wave 1 were included in the analysis.

<sup>a</sup>The Moderate group was only counted if they moved into the Highest group, while the Lowest and Minimal counted if they moved into either the Moderate or Highest.

<sup>b</sup>Term is significant only in Final model and is in opposite direction from expected. Not included in percent calculation.

<sup>c</sup>Percent calculated using A=1; B=.5; N=0.

Rankings are derived from standardized coefficients. Rank is determined first within terms significant in final model, and then within variables only significant in block models. “N/S” - Term never significant in any model (Assigned highest rank value in model +1 for average calculation).

<sup>a</sup>The Moderate group was only counted if they moved into the Highest group, while the Lowest and Minimal counted if they moved into either the Moderate or Highest.
