# Recording with the Roland microphone and Amadeus audio software

open
**System Preferences**
found in your Utilities
directory

open **Sound**

under the input tab,
choose the **C-Media USB
Headphone Set**

depending on what you are
connecting, you might be
choosing the **Line In**

you might need to
experiment with the Input
volume level

open Amadeus software and choose record

the other tabs in the record panel

playthrough will let you listen in while you record

Sound Settings will determine sound quality and file size
