Honesty Policy

All students are bound by the *University Academic Code of Honor.*
http://www.nd.edu/~hnrcode/

Students are obligated to report any infraction of the Code.

*Homework:* It is appropriate for students to discuss the approach to the solution of assigned homework problems with others. This is a legitimate means to gain understanding of the subject matter. However, the work turned in by each student should be original. Copying of solutions from other students or the Solutions Manual is unacceptable.

*Examinations:* All work on exams is to be that of the individual student whose name appears on the title page. No assistance is to be considered from or given to fellow students. Material that can be used as a reference during an examination is limited to that specified.

*Projects:* As with homework, it is appropriate for students to discuss the approach to the projects with other students or resource persons. However, all work and written text is to be that of the student whose name appears on the title page. Quotations from another source must be cited and should constitute only a small part of the report.
