Bandgap+Workfunction Heaven (v.3.4)

Assembled by M. Wistey (mwistey (at) nd.edu) from sources below. This is just a rough guide: strain, interfaces, Fermi pinning, etc. will change apparent band lineups, and may not be transitive. Data have not been verified and could even be wrong. Corrections welcome.

Lower workfn: Li,K,Eu, Sr, Ba, Sm, Na, Ca, Ca, Ce, Li, Tb, Gd, Y, Nd, Lu, Th, La, Sc, Cs, Rb.
