

Math 126B Fall 2004

Name:

You will receive 15 extra credit points on homework for thoughtful answers to these questions received by Wednesday, December 8.

How does the level of the textbook compare with the level of the book you used before?

What was the hardest change to adjust to from the way your high school calculus course was taught? How long did it take to adjust?

What was the most confusing topic? What made it confusing?

How many hours do you usually spend on the course each week outside of class?

Have you gone to your TA's office hours? If so, have you found that helpful?

Have you used the Math Department's help room? If so, how helpful was it?

Have you taken advantage of any of the help the Learning Resource Center offers for the course? If so, what? How helpful was it?

Have you attempted any of the Maple worksheets? If so, which ones? Were they interesting or useful?

Have your plans about whether and what math to take after this semester changed during the semester? If so, how? Why?
