Texts: Assigned readings will be distributed directly.

Requirements: There will be three components in the computation of your final grade for the course:

- (1) **Mid-term and Final Examinations** (50 %). At mid-term and during final examination week, there will be in-class, essay examinations, each counting for 25% of the final grade. One week before each examination, a list of study questions will be distributed to assist you in preparing for the examination.
- (2) **Term Papers** (40 %). Each student will be required to submit a final term paper, of a minimum of fifteen pages, on a topic to be worked out in consultation with the instructor.
- (3) **Class Participation** (10 %). The remaining ten percent of your final grade will be determined on the basis of the quality and extent of your enthusiastic participation in the class.

One-minute Papers: Every class session will end a few minutes early to permit you to do a “one-minute paper,” in which you will write no more than two- or three-sentence answers to two questions: (a) What was the most important point covered in today’s class? (b) What issue or question was left most unclear in your mind at the end of today’s class? These one minute papers will be required of every student at the end of every class session and will be collected at the end of class, but they will not be graded.
