

# Lunar Soils Handbook Errata

The chapter on Apollo 15 soils in the Lunar Soil Handbook contains a mistake regarding 15013 and 15014.

For 15013, the "Location Comments" are: "Collected at Station 8, ALSEP site, from the bottom of a 35 cm deep trench." This is the location of 15014.

For 15014, the "Location Comments" are: ""Contaminated" sample, collected under the bell of the LM descent engine. Top soil layer (uppermost 1 or 2 cm)."  
This is the location of 15013.

The attached map below is of Page 27 in the original single volume Apollo 15 Lunar Sample Catalogue and shows the locations of "013" and "014".

For those of you who have downloaded the Lunar Soils Handbook, please make note of the change.
