

Worksheet 3

Claudiu Raicu

February 8, 2010

I. Evaluate the following integrals

$$1. \int \frac{\ln(x-1)}{x\sqrt{x}} dx$$

$$2. \int \frac{1}{1+2e^x-e^{-x}} dx$$

$$3. \int \frac{x + \arcsin x}{\sqrt{1-x^2}} dx$$

II. Use your favorite approximation method to approximate $\int_0^4 x^3 dx$ (use $n = 4$ intervals). Evaluate the errors and compare them to the theoretical error bounds.

III. Determine whether each integral is convergent or divergent. Evaluate those that are convergent.

$$1. \int_1^\infty \frac{e^{-\sqrt{x}}}{\sqrt{x}} dx.$$

$$2. \int_{-\infty}^\infty \cos(\pi t) dt.$$

$$3. \int_0^\infty \frac{dz}{z^2 + 3z + 2}.$$
