Purpose

Educating tomorrow’s leaders today

The Center for Rare and Neglected Diseases at the University of Notre Dame initiated the Clinical Translational Seminar Series in the Fall 2009. Scientists and clinicians, who are experts in their field, bring first-hand accounts of the state of art in translational research. This provides students an opportunity to ask questions and engage directly with people shaping the field.

Continuing the seminar series

In 2012 the series continued with a focus on rare diseases in Spring and neglected, infectious diseases in Fall.

Look for 2013 series!

Bringing expert knowledge to Notre Dame

Scientific and medical experts from across different sectors—academia, government, industry—come to speak about their research. Students and faculty have spoken with experts in the FDA (RADM Dr. Kweder), in the National Institutes of Health (Dr. Porter. Dr. Austin, and Dr. Gottlieb), CDC (Dr. Lammie), government (Dr. Coyne), industry (Dr. Vandenburg), and academia (Dr. Patterson, Dr. Taylor, Dr. Hotez, Dr. Murphy, Dr. Milord, Dr. Quinn, Dr. Schneewind), among others.
