

Information for Online Homework

Throughout the semester, you will get your homework online and submit your answers online. Your homework will be graded online immediately after you submit. You do not turn in your paper homework to professors or TAs.

The address of the website to get and to turn in homework is www.ilrn.com.

• Registration

After you arrive at this site, you will first need to login by clicking on First Time Users. Next, select

Your State: Indiana

Your school: University of Notre Dame

You will be asked for a Course Key. This is the PIN you must enter to be allowed to enter the program. You will get your PIN from your instructor.

You will need to fill out the registration page. You don't need to fill in everything. However, be sure to fill in your AFS Email address so I can contact you by email. **Please use your Notre Dame AFS Email address. Do not use any other email address.**

In your subsequent visit to the website in the SAME computer, you only need to provide the Course Key.

You should get yourself familiar with various functions of the site. The grade of the first two homework sets will not be counted. However, you are strongly suggested to finish the homework, as this is your opportunity to try iLrn.

• Homework Policy

Homework will be assigned and collected electronically for each class. The homework for each class is available at 2am before the previous class and is due at 2am after the next class with an exception of Wednesday's homework. (Extra two days are given for each of the first two homework assignment.) The following is the chart showing the due days.

Assigned in lecture	Access at 2:00am	Due at 2:00am
Monday	Friday	Thursday
Wednesday	Monday	Monday
Friday	Wednesday	Tuesday

You may choose to print the homework, work on it at your pace and put in answers at another visit (or other visits).

There is a **50% penalty** after due day and an **extra 10%** is added for each day passed. Six days after the due day, you are not allowed to take homework anymore.

- **Electronic Homework Setup**

1. You are allowed 10 takes for each assignment.
2. For each homework problem in each take, you have two chances (each click on "Submit" button counts as one chance). If your first entry is incorrect, the online system will discard it and give you a second chance. Once you used up these two chances, you are not allowed to try the same problem in the same "take".
3. Each time you use another "take", all your answers and scores from the previous "take" are kept. Your best scores will be used for this assignment.
4. You have different versions of assignments for different takes.

- **Electronic Homework Hints**

5. If you want to go away from your computer for a while, click on "Save Process". **Do not** click on "End assignment".
6. Clicking on "End assignment" will end the current "take" and send your score to us. You also need to click on "close" afterwards to close the correct "take".

- **Help Hotline**

You are encouraged to call the students technical support hotline:

1-800-423-0563 Monday - Friday 8:30 am - 6:00 pm Eastern time, or
email at the address **tl.support@thomson.com**

if you have any questions.
