

Frank Pasquale. *New Laws of Robotics:  
Defending Human Expertise in the Age of  
AI*

Main Themes in Chapters 7 and 8

Don Howard  
April 13, 2021

Frank Pasquale. *New Laws of Robotics:  
Defending Human Expertise in the Age of  
AI*

EDUCATION:

Yale Law School, J.D., June 2001

APPOINTMENTS:

Brooklyn Law School (2020 to present)

University of Maryland Carey School of Law  
(2013-2020)

Seton Hall University School of Law (2004-2013)

Arnold & Porter, Washington, DC (2002-2004)

The Long History of Arguments for Why  
Robots and AI Cannot Replace Humans

Frank Pasquale. *New Laws of Robotics:  
Defending Human Expertise in the Age of  
AI*

The Long History of Arguments for Why  
Robots and AI Cannot Replace Humans

Most point to something allegedly unique that  
is internal to the human person and not  
reproducible in a machine:

- Language and Speech
- Sentience
- Consciousness
- Emotion

Frank Pasquale. *New Laws of Robotics:  
Defending Human Expertise in the Age of  
AI*

The Long History of Arguments for Why  
Robots and AI Cannot Replace Humans

But Pasquale advances a very different kind of  
argument, inspired by the philosopher, Ludwig  
Wittgenstein.

Frank Pasquale. *New Laws of Robotics: Defending Human Expertise in the Age of AI*

The Long History of Arguments for Why Robots and AI Cannot Replace Humans

But Pasquale advances a very different kind of argument, inspired by the philosopher, Ludwig Wittgenstein.

He argues that it is the social, cultural, and historical embedding of humans that makes us different in kind even from hypothetical superintelligent robots.

Frank Pasquale. *New Laws of Robotics:  
Defending Human Expertise in the Age of  
AI*

The Long History of Arguments for Why  
Robots and AI Cannot Replace Humans

But to say that robots won't be socially,  
culturally, and historically embedded in the  
same way as me is no different from saying  
that you and I are differently embedded.

And it doesn't settle the question of what  
standing they should have in future and  
whether they should be entrusted with roles  
that humans now play.

Ernesto Caivano, "Echo Gambit"

Frank Pasquale. *New Laws of Robotics:  
Defending Human Expertise in the Age of  
AI*

The Long History of Arguments for Why  
Robots and AI Cannot Replace Humans

What matters is what standing we choose to  
afford them and what roles we choose to give  
them.
