The aim of this course is to develop an understanding of Marxian economic theory, which is often referred to as the Marxian "critique of political economy." This critique is aimed at mainstream economics (both neoclassical and Keynesian) and at the economic and social system celebrated by mainstream economists. Most of the assigned readings are from Karl Marx's *Capital*, volume 1. This book provides the initial steps of Marxian "value theory"—the conceptual means in and through which Marx and Marxist economists have elaborated both the radical differences of their method from that of mainstream economics and their particular analysis of capitalism.

It is crucial to understand the Marxian critique of political economy in its economic and theoretical context. Therefore, we will start with an examination of the current economic crises and then discuss the development of Marx's thought prior to the writing of *Capital*.

Finally, after working our way through a large part of volume 1 of *Capital*, we will read and analyze selections from volumes 2 and 3 of *Capital*, in which Marx developed additional aspects of his economic theory, and discuss the contemporary relevance of Marxian economic theory.

**COURSE REQUIREMENTS**

All students are expected to complete the assigned readings, before the material is covered in class, and to participate actively in classroom discussions. Grading will be based, in addition, on three take-home examinations.

**TEXTS AND READINGS**

Three books have been ordered for the course: Richard D. Wolff, *Capitalism Hits the Fan*; Robert C. Tucker, ed., *The Marx-Engels Reader*; and Karl Marx, *Capital*, volume 1. They can be purchased at the campus bookstore. All other readings (marked by an asterisk) are available on electronic reserve.
Biographies of Marx (and of Friedrich Engels, his frequent collaborator) abound. One of the better ones is Franz Mehring’s *Karl Marx*.

The Marx and Engels Internet Archive [http://marxists.org/archive/marx/index.htm] has a great deal of material relevant to this course.

There are two sets of video lectures on Marx’s *Capital* available on-line:
