

Paul David Feigin,

**Senior Vice President, Technion – Israel Institute of
Technology, Israel**

Dr. Paul David Feigin is a Professor of Statistics at the Technion – Israel Institute of Technology. He has been a Faculty Member there since 1976, after completing Ph.D. studies at the Australian National University. He has published more than 50 scientific papers and supervised seven Ph.D. and many M.S. students. He developed and taught a variety of statistics courses over that period, including *Design and Analysis of Experiments*, *Industrial Statistics*, and *Data Mining Methods*. His research interests have evolved from mathematical statistics through biostatistics to statistical genetics. He is a Fellow of the Institute of Mathematical Statistics. He served as Dean of the Faculty of Industrial Engineering and Management for four years (1999-2002) and is currently completing a six-year term as the Senior Executive Vice President of the Technion. During that term he stewarded the Technion's partnership with Cornell University, which won the New York City competition to establish an applied science research institute – now named the Jacobs-Technion-Cornell Innovation Institute.
