High Energy Neutrino Astrophysics with IceCube

The University of Mainz offers a post-doc position in the IceCube experiment, starting September 1st, 2005. The starting date can be negotiated; the initial appointment is for 2 years. Applicants must have a PhD or an equivalent degree at the time of recruitment.

Our group is involved in the procurement and testing of DAQ electronics, monitoring issues, detection of supernovae and various analysis topics.

The successful candidate should have experience in experimental astroparticle physics; we also welcome applications of particle and nuclear physicists with DAQ and electronics experience.

Applicants should include their CV and a publication list in electronic form. Selected candidates will be asked to send 2 letters of recommendations to the address below.
