

## lightbox steps

- 1 organized a folder of pictures and a folder for their icons  
the icons should be the same height
- 2 create & save an html file in DW  
use can use the demo file as a starting point
- 3 make sure the javascript and stylesheet links are pointing to the proper folder
- 4 duplicate and modify the following 2 lines for each icon

```
<a href="GillPosters/F-002.jpg" rel="lightbox[gillposters]" title="Dress">  
</a>
```

### or manually

- 1 place icon image

```

```

- 2 hyperlink the icon to main image

```
<a href="GillPosters/F-005.jpg">  
</a>
```

- 3 add the following

```
rel="lightbox[gillposters]" title="Christmas Cards"
```

rel="lightbox needs to be there, gillposters can be any name  
the title text will be your caption

- 6 modify css file as desired
