TAKING ACTION, SAVING LIVES
OUR DUTIES TO PROTECT ENVIRONMENTAL AND PUBLIC HEALTH
Kristin Shrader-Frechette

IN THE UNITED STATES ALONE, industrial and agricultural toxins account for about 60,000 avoidable cancer deaths annually. Pollution-related health costs to Americans are similarly staggering: $13 billion a year from asthma, $351 billion from cardiovascular disease, and $240 billion from occupational disease and injury. Most troubling, children, the poor, and minorities bear the brunt of these health tragedies.

Why, asks Kristin Shrader-Frechette, has the government failed to protect us, and what can we do about it? In this book, at once brilliant and accessible, Shrader-Frechette reveals how politicians, campaign contributors, and lobbyists – and their power over media, advertising, and public relations – have conspired to cover up environmental disease and death. She also shows how science and regulators themselves are frequently “captured” by well-funded polluters and special interests. But most important, the author puts both the blame – and the solution – on the shoulders of ordinary citizens. She argues that everyone, especially in a democracy, has a duty to help prevent avoidable environmental deaths, to remain informed about, and involved in, public-health and environmental decision-making. Toward this end, she outlines specific, concrete ways in which people can contribute to life-saving reforms, many of them building on recommendations of the American Public Health Association.

As disturbing as it is, Shrader-Frechette’s message is ultimately hopeful. Calling for a new “democratic revolution”, she reminds us that while only a fraction of the early colonists supported the American Revolution, that tiny group managed to change the world. Her book embodies the conviction that we can do the same for environmental health, particularly if citizens become the change they seek.

Kristin Shrader-Frechette is O'Neill Family Endowed Professor in the Department of Biological Sciences and the Department of Philosophy at the University of Notre Dame, where she also directs the Center for Environmental Justice and Children’s Health. Advisor to the United Nations and to many countries and U.S. agencies on public health, environmental justice, bioethics, and nuclear-waste management, Shrader-Frechette is the author of fifteen books and some 350 articles.

TABLE OF CONTENTS

Preface
1. Lives at Risk
2. Orchestrating Ignorance, Ignoring Consent
3. Private Science, Public Injury
4. Human Rights and Duties not to Harm
5. Obstacles to Responsibility
6. Where We Go from Here

“This is a must-read for anyone who cares about good health, good science, or good democratic citizenship. Shrader-Frechette masterfully integrates scholarly rigor, inspirational stories, and a wealth of facts to create a book that you won’t want to put down.”
- Kevin Elliott, Ph.D., University of South Carolina

“This Taking Action, Saving Lives is Kristin Shrader-Frechette’s finest work to date. With unique and important arguments, she combines the literatures of public health, environmental ethics, human rights, and discursive democracy in what is not only a work of scholarly synthesis, but an important ethical guide to all citizens.”
- John Martin Gillroy, Ph.D., LL.M., Lehigh University

PRAISE FOR SHRADER-FRECHETTE’S TAKING ACTION, SAVING LIVES

“Influential and impressive. A must-read.” – Nicholas A. Ashford, Professor of Technology and Policy Massachusetts Institute of Technology

“Important and compelling, clearly written, accessible. I enthusiastically recommend this book.” – James F. Childress, Hollingsworth Professor of Ethics University of Virginia

“This book shakes the reader.” – Avner de-Shalit, Kampelman Professor of Democracy and Human Rights, Hebrew University of Jerusalem

“Powerful, perspicuous, convincing. Essential reading for today.” – Inmaculada de Melo-Martin, Weill Medical College, Cornell University

“A must-read -- a book you won't want to put down.” – Kevin Elliott, Philosophy Department, University of South Carolina

“An eloquent and persuasive plea to scientists and citizens.” – George W. Fisher, Emeritus Professor of Geology, Johns Hopkins University

“Engaging, compelling -- deserves to be read by nearly everyone.” – William R. Freudenburg, Dehlson Professor of Environment and Society, University of California, Santa Barbara

“By one of America’s foremost philosophers and public intellectuals; immensely readable, courageous, often startling, insightful.” – Richard Hiskes, Professor, Political Science, University of Connecticut

“Timely, accessible, and written with enviable clarity and passion. A distinguished philosopher sounds an ethical call to arms to prevent illness and death from pollution.” – Sheila Jasanoff, Pforzheimer Professor, Kennedy School, Harvard University

“A blistering account of how advocacy must be brought to bear on issues of justice and public health.” – Jeffrey Kahn, Maas Chair in Bioethics, University of Minnesota

“Breaks new ground in linking environmental protection with social justice. A brilliant inquiry.” – Sheldon Krimsky, Professor, Urban and Environmental Policy and Planning, Tufts University

“Powerful, lucid, disturbing, poignantly hopeful, lively; deserves to be widely read.” – Hugh Lacey, Scheuer Professor of Philosophy Emeritus, Swarthmore College

“A powerful call to action that needs to be heard by consumers and policymakers alike.” – Anna C. Mastroianni, University of Washington School of Law

“No other author can so forcefully bring together ethical analysis, government policy, and environmental science. Outstanding.” – Colleen Moore, Professor of Psychology, University of Wisconsin

“Accessible, thoughtful, exceptional. It made me want to go out and slay a few dragons of my own!” – Felicity Sackville Northcott, Dean’s Liaison, Johns Hopkins University

“Convincing, with an impressive command of scientific knowledge. No book more clearly demonstrates the need for citizen action.” – Mark Sagoff, School of Public Policy, University of Maryland

“Like Rachel Carson’s Silent Spring -- brilliant, brave.” – Sylvia Hood Washington, School of Public Health, University of Illinois, Chicago
