UNIVERSITY OF NOTRE DAME DEPARTMENT OF MATHEMATICS MATHEMATICS 105 – ELEMENTS OF CALCULUS I Fall Semester 1991

TEXT: Calculus and its Applications (Edition 5) by Goldstein, Lay and Schneider

EXAMINATION SCHEDULE:

Exam I	Tuesday, September 17 at $8{:}00~{\rm a.m.}$
Exam II	Thursday, October 17 at 8:00 a.m.
Exam III	Tuesday, November 26 at 8:15 a.m.
Final	Monday, December 16 at 1:45 p.m.

The rooms for these exams will be announced in class as they are given to us by the Registrar. These rooms will almost certainly NOT be your usual classroom and may very well be different for different sections. They may also change from exam to exam at the discretion of the Registrar. Exams I–III are each one hour long and each is worth 100 points. The final exam lasts two hours and is worth 150 points.

EXAMINATION PROCEDURES: Each student is expected to attend the exams at the scheduled times and in the assigned room. It is YOUR responsibility to do this. Some of you will have legitimate excuses and conflicts which may prevent this. The sooner we know of these problems the more likely it is that a satisfactory solution can be worked out. Specifically, but not exclusively:

- (i) any conflicts between these examinations and other scheduled examinations you may have should be brought to the attention of your instructor as soon as they are known to you;
- (ii) the schedule of Finals is known NOW, so you should check to see that you do not have 3 examinations in a 24 hour period, etc.(if you do let your instructor know now);
- (iii) mail a copy of these dates to your parents so that there will not be family conflicts (your mother likes to hear from you anyway);
- (iv) if you miss a scheduled examination without an official excuse from the Associate Vice President for Residence Life, you will receive a score of 0 for that examination;
- (v) if you do miss an exam, advise your instructor of the situation immediately.

These exams are given under the provisions of the Honor Code – if you entered Notre Dame before the introduction of the Honor Code and are unwilling to be bound by its provisions, contact your instructor by September 6.

GRADES: Your grade for this course will be determined primarily from your numerical scores on the four exams. After each of the hour exams, we will post a letter grade scale of A,B,C,D or F, as an indication of how well you did on that exam. The midterm grade for freshman will be A,B,C,D or F and will be based on your exam scores for the first two tests. We will give pluses and minus for final grades. The course grade itself is determined by your total test scores. In case you are close to the border between two grades, your instructor may use attendance, quiz scores, homework scores, etc. to decide your final letter grade.

ATTENDANCE: Freshman are required by the University to attend all classes. According to University regulations, a freshman may be given the grade of "F" if he or she accumulates more than three unexcused absences after receiving a written warning from the instructor. All students are responsible for any information given out in class (e.g. exam room assignments and homework) and for any work done in class (e.g. quizzes).

HOMEWORK: Homework will be assigned regularly and it will be graded. It should be done by all students. The instructor may use homework records to decide borderline grade cases at the end of the semester. You should be sure you understand your instructor's directions as to how homework will be assigned and collected.

HELP: There will be two help sessions per week, except for the week of an exam when special arrangements will be made. The normal schedule will be Tuesday and Thursday evenings beginning at 7:00 p.m. in room 226 of the Math. building.
