

MATH 325

PROFESSORS: Hwang, Mast, **SMYTH**

TEXT: Elementary Differential Equations and Boundary Value Problems, by Boyce and di Prima. 5th Edition (John Wiley & Sons Inc.)

The material covered will be from Chapters 4, 6, 7, 8, 9, and 10.

Homework is an important part of this course: this will be regularly assigned, graded and returned. Your performance on homework will be used to determine your final grade in the course in all borderline cases. Late homework will not be accepted.

There will be 3 tests (worth a 100 pts. each) and a Final Examination (worth 150 pts.) which will cover the material of the entire course. The tests will take place in class on the following days:

TEST I	Monday 27th, September
TEST II	Monday 1st, November
TEST III	Monday 29th, November

The **Final Examination** is scheduled for **Tuesday December 14, 1993** at 1:45p.m. - 3:45p.m.

Unexcused absences from a test or exam will result in a grade of zero for that test or exam.

The Honor Code is in effect.

Discussion between students on homework is, however, allowed.
