UNIVERSITY OF NOTRE DAME
DEPARTMENT OF MATHEMATICS

MATHEMATICS 325 - DIFFERENTIAL EQUATIONS

FALL SEMESTER 1995

PROFESSORS: Mast, Shaw, Smyth

TEXT: Elementary Differential Equations and Boundary Value Problems by Boyce and di Prima. <u>5th Edition</u> (John Wiley & Sons Inc.)

HOMEWORK is an important part of this course: this will be regularly assigned, graded and returned. Your performance on homework will be used to determine your final grade in the course in all borderline cases.

There will be 3 tests (worth a 100 pts. each) and a Final Exam (worth 150 pts.) which will cover the material of the entire course. The tests will take place in class on the following days:

TEST I	Monday	**September 18**
TEST II	Wednesday	**October 25**
TEST III	Monday	**November 20**

The **Final Examination** is scheduled for **Wednesday, December 13, 1995** at **1:45p.m. - 3:45p.m.**

Missing a scheduled test without an official excuse will result in a score of zero for that test.
