Extra Credit Assignment, due no later than the last day of classes

Professor Brockman has very kindly given us a copy of the chapter on “Scientific Computing with MATLAB” from the current draft of the textbook *Engineering Systems: An Introduction*. In exchange, he would appreciate feedback. So, you will receive extra credit for your feedback. Please answer the following questions.

1. What parts of the chapter did you read?
2. What did you find useful? Why?
3. Is this material a helpful addition to the material in the *ATLAST* book? (I’m assuming the book will eventually arrive.)
4. What parts did you particularly like? Why?
5. What parts did you find confusing? Why?
6. What suggestions do you have for improvements?
7. Did you find any mistakes? If so, what?
8. Anything else you think might be useful feedback.
