

PROGRAMS TO LOOK FOR

This is the fourth year that *U.S. News* is publishing a list of schools with outstanding examples of academic programs that are believed to lead to student success. With the help of education experts, including staff members of the Association of American Colleges and Universities, we identified eight such

program types. We then invited college presidents, chief academic officers, and deans of admission to nominate up to 10 institutions with stellar examples of each kind of program. Colleges and universities that were mentioned most often are listed here, in alphabetical order.

INTERNSHIPS / CO-OPS

Schools nominated in this category require or encourage students to apply what they're learning in the classroom to work in the real world—through closely supervised internships or practicums, or through cooperative education, in which one period of study typically alternates with one of work.

SENIOR CAPSTONE

Whether they're called a senior capstone or go by some other name, these culminating experiences ask students nearing the end of their college years to create a project of some sort that integrates and synthesizes what they've learned. The project might be a thesis, a performance, or an exhibit of artwork.
