PART 1 METAPHYSICS: NONSENSE OR WISDOM?

Chapter 1 The Problem of the Unification of Knowledge 3
A. The Information Explosion and Interdisciplinarity 3
1. The Fragmentation of Knowledge Today 3
2. Interculturality and Contextualization 4
B. The Common Human Search for Meaning 5
1. Older Worldviews 5
2. The Global Expansion of Science and Technology 12
C. The Conditions of Effective Intercultural Dialogue 15
D. The Modern University as Wisdom’s Home 19

Chapter 2 The Historical Varieties of “Metaphysics” in Western Culture 22
A. The Unification of Knowledge by One Material or Spiritual Principle 22
B. The Unification of Knowledge by Coordinating Autonomous Disciplines 27
C. Medieval and Renaissance “Metaphysics” 31
D. Modernity and Metaphysics 32
1. Cartesian and Idealist Metaphysics 32
2. British Empiricism 34
3. Kant and the Post-Kantian Critique 36
4. The Varieties of Thomistic Metaphysics 44
   a. Essentialist Thomism 46
   b. Platonizing Thomism 47

© 2006 University of Notre Dame Press
c. Transcendental Thomism 48
d. Existential Thomism 49
e. Phenomenological Thomism 51
f. Analytic Thomism 51
g. Semiotic Thomism 51
h. Aristotelian Thomism 53

E. Postmodernism and Metaphysics 55

Chapter 3  Natural Science Is Epistemologically First 61
A. The Logical Structure of Any Discipline 61
   1. Every Science Has a Foundational Treatise 61
   2. Question 1 about Existence 64
   3. Questions 2 and 3 about Substantial Essence Known through Properties 67
B. The First Principles of Natural Science 72
   1. Principle of Non-contradiction 72
   2. Principle of Causality 73
   3. The Fundamental Theorem of Natural Science 74
C. Questions 3 and 4 about the Causes of Properties 76
   1. The Nine Categories of Properties of All Changeable Beings 76
   2. Why All Changeable Substances Have These Nine Properties 78
      a. The Intrinsic Properties 79
         1. Quantity 79
         2. Quality 79
      b. Relation and the Relational Properties 80
         3. Relation 80
         4 and 5. Action and Receptivity 81
         6, 7, and 8. Place, Position, and Environment 83
         9. Time 83
      c. Summary 84
D. Are the Aristotelian Foundations of Natural Science Obsolete? 85
   1. The Natural Senses vs. Instruments and Experiments 85
   2. Scientific Universality and Individuation 87
   3. The Scientific Revolution and the Foundations of Natural Science 89
Chapter 4  The Culminating Foundational Theorem of Natural Science  92
A. The Prime Movers of Systems  92
   1. All Systems of Interacting Bodies Have Prime Movers  92
   2. Proof that a First Immaterial Cause Exists  93
B. The Special Case of the Human Soul  101
C. A Universe of Both Material and Spiritual Substances  114
   1. The Existence of Contingent Pure Spirits  114
   2. Does Modern Science Exclude Spiritual Substances?  117
D. Natural Science Validates First Philosophy  120
   1. First Philosophy Presupposes All the Special Sciences  120
   2. Natural Science Is Not First Philosophy but Establishes Its Ground  122
E. Dialogue with Other Views of Nature  124

Chapter 5  The Existence and Essence of Metascience  132
A. The Existence and Validity of an Autonomous Metascience  132
B. What Is the Proper Subject of Metascience?  133
   1. The “Analogy” of Being  133
   2. The Descriptive Definition of the Generic Subject of Metascience  139
C. Are Other Worldviews Metascientific?  144
D. Objections to the Natural Science Approach to Metascience  146
   1. Thomist Objections  146
   2. Objections from Modern Science  163

PART 2  THE PROPERTIES OF ALL REALITY

Chapter 6  Unity, Plurality, and Efficient Causality  173
A. The Transcendentals  173
B. The Demonstration that Being as such Is One  175
   1. Transcendental “Unity” and Its Contrary “Plurality”  175
   2. The Demonstration of Unity as Intrinsic to Every Being  177
C. Unity and Plurality of Contingent Material Beings  179
   1. Substantial Unity and the Plurality of Properties  179
   2. The Unity of a Species and the Individuation of Its Members  186

© 2006 University of Notre Dame Press
D. The Unity of Contingent Spiritual Substances 188
   1. The Embodied Human Spirit 188
   2. The Hierarchy of Contingent Pure Spirits 192
      a. The Community of Spirits 192
      b. The Unity of the Spiritual and Material Realms 196
E. Unity, Plurality, and Efficient Causality 198

Chapter 7 Unity and Plurality in Other Sciences 201
A. Unity and Plurality in Mathematics 201
   1. Natural Science and Mathematics 201
   2. Ancient Mathematics 203
   3. Modern Mathematics 205
B. Mathematical Physics and Cosmic Unity and Diversity 218
C. Unity and Plurality in Ethics and Politics 226
   1. The Unity of the Virtues 226
   2. Persons in Community 228
D. Unity and Plurality in Technologies and Fine Arts 231

Chapter 8 Truth and Formal Causality 234
A. The Varieties of Truth 234
   1. Logical and Ontological Truth 234
   2. The Sources of Truth 239
      a. Styles of Human Reasoning 239
      b. Faith and Revelation 241
      c. Mystical Experience 242
B. Epistemology 245
   1. Skepticism and Sophism 245
   2. Idealism’s Answer to Skepticism 247
   3. Empiricism’s Answer to Skepticism 249
   4. Aristotelian Thomism’s Answer to Skepticism 255
   5. Personalism and Thomism 265
C. Formal Causality and Participation 267

Chapter 9 Truth in the Special Sciences 277
A. Scientific Logic 277
   1. Aristotelian Logic 277
      a. The Kinds of Logic 277
      b. The Scientific Syllogism 278
Chapter 10  Goodness and Final Causality  322
A. Finality, the Causes of Causes  322
   1. Finality and the Other Causes  322
   2. Intrinsic and Extrinsic Finality  325
B. Beauty as a Transcendental  326
   1. The Concept of Beauty  326
   2. Physical Beauty  328
   3. Spiritual Beauty  329
C. Dialogue with the Aesthetics of Other Cultures  330
D. The Problem of Evil  334
E. Love  338

Chapter 11  Finality in the Special Sciences  343
A. Teleology in Natural Science  343
B. Teleology in Mathematics  346
C. Means and Ends in the Practical Sciences  347
   1. Deontology and Teleology in Individual Ethics  347
   2. Revisions of Thomistic Ethics  357
   3. Teleology in Social Ethics  366
   4. Teleology in Technology and Ecology  371
D. Teleology in the Fine Arts  372
E. Dialogue with the Ethics of Other Cultures  375
F. Final Causality and the Coordination of Knowledge  379
PART 3  THE FIRST CAUSE OR ABSOLUTE PRINCIPLE OF BEING

Chapter 12  The Absolute and/or Nature

A. The Monistic View of the Supreme Principle 385
   1. Monism and Monotheism 385
   2. Materialistic or Nature Monism 386
   3. Process Philosophy Monism 387
   4. Spiritual Monism 389
      a. Monism in the Traditional Religions and Occultism 389
      b. Neoplatonism 392
      c. Indian, Chinese, and Japanese Monism 394

B. Critique of Monism 397

Chapter 13  The One Creating First Cause

A. Monotheism 403
   1. The Existence of a Creator 403
   2. The Divine Essence 406

B. The Divine Attributes 409
   1. The Plenitude of the First Cause 409
   2. The First Cause Is Personal 412

C. God and Creation 421
   1. The Triple Causality of God as First Cause 421
   2. The Extrinsic Formal Causality that Is Exemplarity 422
   3. The Hierarchy of Creatures 428

PART 4  WISDOM, HUMAN AND DIVINE

Chapter 14  The Way toward Wisdom

A. Unified and Open Education 433
   1. Education in the Family 433
   2. Liberal Arts Education 434
   3. Higher General Education 439
   4. Professional Education 443
   5. Continuing Education 445

B. Summary: Dialogue in the Search for Wisdom 446
