

Category	Priority	Task
Trainee Console	1	Add scrollbar to received injects popup window
Trainee Console	1	When you hit enter in the chat box, then should automatically send the chat (all communication mediums)
Trainee Console	1	2 public schools listed in dialogue box (mission/task/chat area)
Trainee Console	1	2 Salvation Army's listed in dialogue boxes (mission/task/chat area)
Trainee Console	1	Add an instruction "who to task" in the mission/task posting
Trainee Console	1	Add button to edit/delete position log
Trainee Console	1	Add button to edit/delete significant event
Trainee Console	1	No ' " / in the text - in adding injects for now
Trainee Console	1	Look up standardized FEMA resource typing for the resource requests
Trainee Console	1	Log the full chat and have the ability for the researcher to pull up the chat logs and analyze them
Trainee Console	1	Check that if someone doesn't acknowledge the start button until after the exercise, then they don't miss injects? (or should they?) or unrealistic because of fast time?
Trainee Console	1	Get response working in received injects
Trainee Console	1	In Road Closure [under status boards], put a space after the dates
Trainee Console	1	In POD [under status boards], put a space after the dates
Trainee Console	1	In Hospital [under status boards], put a space after the dates
Trainee Console	1	In Shelter [under status boards], put a space after the dates
Trainee Console	1	Delete mission/tasks (after table reset) doesn't seem to work
Trainee Console	1	Ensure not allowed to edit other individuals mission/tasks (fix the mission/tasks)

Trainee Console	1	Resource request [add request – quantity may be other than just gallons – (eg 100 gallons)]
Trainee Console	1	http://veocdev.crc.nd.edu:8080/veoc/dojotelephone.php (put a scroll bar on the rest of the communication tools)
Researcher	1	For the researcher -> have the ability to pull up position logs
Researcher	1	Log the full chat and have the ability for the researcher to pull up the chat logs and analyze them
Researcher	1	Create more/better evaluation metrics
Researcher	1	Add desired action to player reports for injects
Researcher	1	Add desired action to player reports for injects
Logistics	1	Logistics – put a notes section for each logistics request
Logistics	1	The text cuts off in the contract resources, delete columns
Logistics	1	Create a search for through the contracts
Login/Logout	1	Put an “you are now logged in. you can minimize this screen.” Message on the index of the login pages (so don’t have blank pages in the web browser).
Login/Logout	1	Have an automatic logout of the person closes the window without logging out. Or if someone closes the exercise panel without closing the main panel, then have an error or logout as well
Login/Logout	1	Have logistics and planning login and logistics and only see logistics and planning elements
Login/Logout	1	In the login screen, take the space out between select an individual
General	1	Salvation Army is listed twice
General	1	Get Eclipse set up on mac to have a triple backup of the files
General	1	Expand menu bars to fit everything (different browser editions and monitors have different sizes, although it’s specified in the javascript)

General	1	When minimize the bar, the size of the window stays the same, the size of the window should collapse shorter or expand longer as well
General	1	Error - unable to create inject table: Incorrect table name 'testuserHurricane2DepartmentofChildrenandFamilies17Jul2011usertable'
General	1	Error - could not create afteraction table: Incorrect table name 'testuserHurricane2HumanServicesBranchDirector17Jul2011afteraction'
General	1	Exercise can begin at any time after the player logs in or the exercise may already have begun; non-AI case
General	1	Delete files under http://veocdev.crc.nd.edu/RegularLogin2.php
General	1	Delete files under http://veocdev.crc.nd.edu/
General	1	Reseting the script tables doesn't reset mission/tasks
Exercise Developer Console	1	Add scroll bars to the metrics developer
Exercise Developer Console	1	Add scroll bar to add metric
Exercise Developer Console	1	Add spaces between metrics
Exercise Developer Console	1	Add the ability to delete the picture of the initial status
Exercise Developer Console	1	Adding injects: prevent duplicate inject numbers: and out of order inject numbers (have an up/down re-ordering of injects)
Exercise Developer Console	1	Delete inject doesn't work anymore?
Exercise Developer Console	1	Edit inject doesn't work anymore
Exercise Developer Console	1	Ensure the script does not allow duplicate inject id's
Exercise Developer Console	1	When creating new injects, should automatically insert the new inject number
Exercise Developer Console	1	double check if deleted a script and then recreate it (I think it works and all the tables are cleared)

Exercise Developer Console	1	The text cuts off in the script developer when too long (make the interface wider)
Exercise Developer	1	In script developer - fix that if choose a different (higher number) than is in the add inject from database
Exercise Developer	1	Also add every new inject to the database (but how to deconflict so that don't have same ones)
Exercise Controller	1	Pause Exercise
Exercise Controller	1	The text cuts off in the script developer when too long (make the interface wider)
Exercise Controller	1	Add ability to move the injects up or down on the page to rearrange the elements as desired
Exercise Controller	1	Terminate Exercise
Exercise Controller	1	Does everyone who is logged in get a response to begin the exercise or just the people in the script
Disaster Assistant	1	Change the disaster assistant name from AIDAC to disaster assistant
Dashboards	1	Create more and better/more interactive dashboards
Trainee Console	2	Download a free chat program and log all chat conversation to pull up from the researcher side
Trainee Console	2	Miami-Dade Resources don't show up in player's panel
Researcher	2	Researcher logfile -> have capability to view, order, analyze, extract elements
Planning	2	Have planning elements able to create and update incident action plans
General	2	Create a tutorial (in Mayo?) or a simple voiceover demo
Exercise Developer Console	2	Ability to upload a script and upload resources
Exercise Developer Console	2	Create figures in the exercise handouts for the players
Exercise Developer Console	2	Add ability to move the injects up or down on the page to rearrange the elements as desired

Trainee Console	3	Have interactive EOC floor_plan/map (instead of downloadable pdf file)
Trainee Console	3	Have a checkbox/radiobox for mission/tasks if they have to go through the branch manager for approval
Trainee Console	3	Face to face - when hit cancel, doesn't cancel [Windows Safari]
Login/Logout	3	Download a chat program to make chat more efficient that using comet
General	3	Hold an experiment with the lab at Notre Dame?
General	3	Get working with different web browsers and between the same web browser (upgrade to firefox 4.x and/or 5.x)
General	3	Forget user id
General	3	Forget password
General	3	Reset password
General	3	Request user id/vEOC user account
General	3	Disaster Mapping Tool works on Windows Safari (but not saving the flood), but not on Mac version Miami-Dade resources - limit to non-negative numbers
Exercise Developer Console	3	Automatically link capabilities with metrics
Exercise Developer Console	3	Create an exercise handout for the evaluators? (with figures)
Exercise Developer Console	3	Create exercise evaluation guides from the capabilities and the metrics
Exercise Controller	3	Fast-Time Exercise
Exercise Controller	3	Get Next Block working (i.e. advance to the next inject)
Exercise Controller	3	Dojo channels don't response the second time through an exercise [Windows Safari - check in general]
Exercise Controller	3	On Windows Safari, when play an exercise, it doesn't respond the second time around
Disaster Assistant	3	Update the chat function to be better and more responsive
Administrator	3	Create an admin console

Administrator	3	Have admin ability to reset the players
Administrator	3	Create and delete user logins
Trainee Console	4	Add help files (free software program to set this up for us)
Trainee Console	4	Retrieve archives (what about clashes and tables with the same names?)
Trainee Console	4	Try dynamic updates for the mission/tasks and resource requests (see if can get the mission/task dialogue box to reappear when tasked with one)- review when have two mission/tasks (I think there was an error that I was still working on)
General	4	Release software on sourceforge (scrube files for passwords and databases and access to our server)
Trainee Console	?	only allows 1 chat at a time over 1 communication medium
Trainee Console	?	Not limit talking to just 1 individual?
